Dear Mr Wemberg,

Since when have you made peace with the FBI? It is obvious that it is this agency wanted to know what I know about S. Zoneworlds case. It would be an interesting additional chapter to the Holocaust. But here even the jews who have had to fight the nazi gestapo are scared of the U.S. gestapo and behaving like rabbits.

My File as per FIA From FBI was falsified what concerns the talk in my Place in 1942 with FBI agent. It is all white like a snow-white but no mention

of S. Commanders while other parts are 90% erased. The FBI denys having the copy of the letter of the old bastard E. Howe who wrote me I should even not dare to think about.

I suppose you heard about the book and movie "Lincoln conspiracy". In Philadelphia Inquirer was a story refuting the events in the book ~~and~~ by a "professor" from PA state college. When I wrote to this professor my letter came back — no such one exist there. And this was 100 years ago. Probably JFK case will still be mystery after the same times.
